

NEW!
LOCKING HANDLE OPTION
FOR MARELON® INTEGRATED SEACOCKS
1" THROUGH 2" SIZES

Forespar® now offers an optional locking plate factory installed on any "93" series Integrated Seacocks in the 1" through 2" sizes. These new locking plates allow the handle to be set in the closed position and a pad-lock used to positively lock the valve closed. This new locking feature will satisfy the USCG requirements for locking overboard discharge head system seacocks in the closed, no discharge position.

Valve closed and locked

Works on Dual Port / "Y" Valves

Any style pad lock can be used

#930136 Optional handle lock for 1" and 1-1/4" Marelon® Integrated Valves. \$5.00 List

#930137 Optional handle lock for 1-1/2" and 2" Marelon® Integrated Valves. \$5.00 List

**Note: Forespar® does not supply the pad lock.
Not sold separately. Must be ordered with "93" valves and factory installed.
Available as an option on new Marelon® Integrated System Valves only, beginning Sept. 15, 2004.**
